AI ENVOY SPHERE

Build a competitive edge with your company's digital twin and AI agent councils

AI ENVOY SPHERE lets you create a digital twin of your company and digitize expert teams, combining multi-agent orchestration, company knowledge, external information, security, integrations and governance in one environment.

Business benefits

Faster automation

Streamline processes and get answers, knowledge and decisions faster.

Higher productivity

Empower teams with AI agents and councils via chat and voice, using files and images.

Security & compliance

Secure AI on your Azure infrastructure, with roles, policies, content filters and logs.

Democratize AI

Create, test, deploy and share agents across your organization at any scale.

Key platform capabilities

Agent creation

- Configure models, prompts, response styles, skills and AI parameters.
- Agent and agent council marketplace, accessible via the app, Teams, API and other messaging platforms.

Multi-agent orchestration

- Sequential, Concurrent, Handoff, Group Chat, Magentic.
- Delegate tasks between agents equipped with skills and company knowledge.

Company knowledge & RAG

- Document indexing and connectors: SharePoint, Outlook, web, API.
- Citations, source scoring, chunk monitoring, reasoning traces and data source cards.

Chat & collaboration

- Chat, voice, transcription, images and video. Agent interaction history. Favorites.
- Export results to PDF, DOCX, PPTX and XLSX.

Deployment & integrations

- MCP servers, Teams, Web Embed, REST API, Outlook, Slack, Telegram, Discord, Azure Logic Apps, n8n.
- Providers: OpenAI, Anthropic, xAI, DeepSeek, Meta, Mistral AI.

Governance & analytics

- Admin dashboard and reports on usage, quality, risk and ROI.
- Automated and manual agent evaluation, quality alerts and an audit trail.

Example application areas

Customer service | **Operations** | **Sales** | **HR** | **Compliance** | **IT**

Ideal for: knowledge assistants, process automation, document analysis, board and management support, employee support and customer service, tender management, proposal preparation, employee onboarding, incident analysis, process optimization, cost and ROI analysis.

AI agent councils help when decisions need multiple perspectives—legal, financial, technical, operational and compliance. They can support contract analysis, RFP responses, complaint handling, IT/security incidents, executive briefs and process assessment.
