AI ENVOY SPHERE

CASE 01 • RFP / PROPOSALS

Sales • Bid Management • Delivery

Agent council for enquiries and RFP responses

Helps teams quickly prepare complete, consistent proposals with full oversight.

Business challenge

Responding to an RFP involves sales, legal, architecture, finance and delivery teams. Coordinating knowledge, risk reviews and document versions slows down the entire process.

AI agent council

1 **Sales agent**
Analyses client needs and the sales opportunity context.

2 **Technical agent**
Reviews functional and architectural requirements.

3 **Legal agent**
Identifies contractual risks and clauses needing attention.

4 **Finance agent**
Estimates proposal costs, margin and profitability.

5 **Compliance agent**
Checks requirements against policies and regulations.

6 **Editorial agent**
Compiles the final, consistent proposal response.

How it works

01 **Sources and context**
Documents, data, case history and requirements.

02 **Agent analysis**
Each agent adds its own perspective and assessment.

03 **One recommendation**
Synthesis, rationale and material ready for action.

Business impact

Faster proposal preparation, fewer errors, better responses and greater risk control.

Proposals ready sooner

CASE 02 • CONTRACTS / RISK

Legal • Finance • Operations • Security

Agent council for contract analysis

Speeds up contract reviews across business, legal and procedural perspectives.

Business challenge

Many people review contracts, while risk findings often remain scattered across departments, comments and document versions.

AI agent council

1 **Legal agent**
Flags risky clauses and terms for negotiation.

2 **Finance agent**
Analyses penalties, payments, costs and financial implications.

3 **Operations agent**
Assesses whether obligations can be met in practice.

4 **Security agent**
Reviews data and security requirements.

5 **Negotiation agent**
Suggests amendments, comments and alternative wording.

How it works

01 **Sources and context**
Documents, data, case history and requirements.

02 **Agent analysis**
Each agent adds its own perspective and assessment.

03 **One recommendation**
Synthesis, rationale and material ready for action.

Business impact

Faster contract reviews, consistent recommendations and a fully traceable rationale.

Risks under control

CASE 03 • COMPLAINTS

Customer Care • Complaints • Quality • Legal

Agent council for complaints and escalations

Helps resolve complex customer cases quickly, in line with regulations and company policy.

Business challenge

Complex complaints require a combined review of customer context, case history, terms and conditions, the law, process quality and company policy.

AI agent council

1 **Customer agent**
Reviews the relationship history, support cases and past decisions.

2 **Policy agent**
Checks applicable rules and procedures.

3 **Legal agent**
Assesses dispute risk and the implications of communications.

4 **Quality agent**
Detects process errors or deviations from standards.

5 **Communications agent**
Drafts a clear, empathetic response to the customer.

How it works

01 **Sources and context**
Documents, data, case history and requirements.

›

02 **Agent analysis**
Each agent adds its own perspective and assessment.

›

03 **One recommendation**
Synthesis, rationale and material ready for action.

Business impact

Faster decisions, less risk of an incorrect response and a better customer experience.

Better escalation handling

CASE 04 • IT / SECURITY

CIO • CISO • SOC • IT Operations

Agent council for IT and security incident analysis

Helps IT and security teams quickly correlate information and prepare business status updates.

Business challenge

Incidents require rapid correlation of logs, alerts, messages, system changes, deployments and operating procedures.

AI agent council

1 **SOC agent**
Analyses alerts, events and potential attack vectors.

2 **Infrastructure agent**
Checks system dependencies and environment status.

3 **Application agent**
Analyses errors, deployments and application changes.

4 **Compliance agent**
Assesses reporting duties and formal requirements.

5 **Communications agent**
Prepares status updates, summaries and business recommendations.

How it works

01 Sources and context
Documents, data, case history and requirements.

02 Agent analysis
Each agent adds its own perspective and assessment.

03 One recommendation
Synthesis, rationale and material ready for action.

Business impact

Faster diagnosis, better team coordination and more complete incident documentation.

CASE 05 • KNOWLEDGE / RAG

Knowledge Management • HR • IT • Operations

Agent council for corporate knowledge management

Combines knowledge from documents, procedures, SharePoint, emails, websites and systems to provide answers with sources.

Business challenge

Corporate knowledge is scattered across procedures, contracts, correspondence, technical documentation and systems, so employees waste time searching for it.

AI agent council

1 **Procedures agent**
Answers operational questions and identifies relevant instructions.

2 **Documentation agent**
Explains technical and system details using knowledge base information.

3 **Legal agent**
Interprets formal provisions, contracts and terms and conditions.

4 **Training agent**
Locates training information and answers questions using FAQs.

5 **Synthesis agent**
Creates one coherent answer with a rationale, citations and scores.

How it works

01 **Sources and context**
Documents, data, case history and requirements.

02 **Agent analysis**
Each agent adds its own perspective and assessment.

03 **One recommendation**
Synthesis, rationale and material ready for action.

Business impact

Employees find answers faster, while the organisation retains control over knowledge sources and quality.

CASE 06 • MANAGEMENT

Management • Strategy • Finance • Operations

Agent council for management decisions

Prepares decision briefs by analysing issues from finance, operations, sales, legal and risk perspectives.

Business challenge

Management decisions require finance, operations, sales, legal and risk perspectives, yet the input data is often scattered across departments.

AI agent council

1 **Finance agent**
Analyses costs, ROI, budgets and economic impact.

2 **Operations agent**
Assesses the impact on processes, resources and execution.

3 **Sales agent**
Assesses the impact on customers, revenue and the market.

4 **Risk agent**
Identifies threats, dependencies and risk scenarios.

5 **Strategy agent**
Prepares a decision recommendation and options for action.

6 **Marketing agent**
Provides marketing and public relations recommendations

How it works

01 **Sources and context**
Documents, data, case history and requirements.

02 **Agent analysis**
Each agent adds its own perspective and assessment.

03 **One recommendation**
Synthesis, rationale and material ready for action.

Business impact

Faster preparation of management materials and better decisions based on data.

Better decisions, faster
